

Parallel Sessions C  
C2 – AGMB, Annual Meeting of the German MLA

Friday, September 20, Room C, 15.45

## **Electronic Patents in Pharma Research and Development**

Engelhardt, T-P

Engelhardt, Thies-Peter: Head of Scientific Library, Bayer AG, Business Group Pharma  
PH-R-EU Scientific Information and Research Support, thies-peter.engelhardt.te@bayer-ag.de

Next to scientific literature patents are the document type second most requested by scientific customers of Pharma Industry Libraries. Bayer Pharma Research established global Intranet access to electronic patents using MicroPatent TOPS in a two step approach thus replacing existing networked CD-ROM applications. Some 33 million electronic fulltext patents of the world's 45 major patent offices covering several decades of patenting or even all existing patents e.g. EP, US and PCT are now available via the Bayer Intranet and linked to related Intranet applications. Additional functions like full text retrieval, INPADOC patent family retrieval and tools for graphical visualisation help to serve several hundred users each month.
