Slide 1

U1

Good morning, My name is Silvia Sastre and I'll would like to invite you, to think with me about the statistical data that the e-journals give us. For this! the question that I ask you is If....

(Buenos días, mi nombre es Silvia Sastre y me gustaría invitaros a reflexionar conmigo sobre los datos estadísticos que nos ofrecen las revistas electrónicas. Por ello! la pregunta que os planteo es....)

Usuario: 27-05-2010

Objective

Are the statistical data of the contracted electronic resources really useful for library management?

The Team

Contracted electronic resources

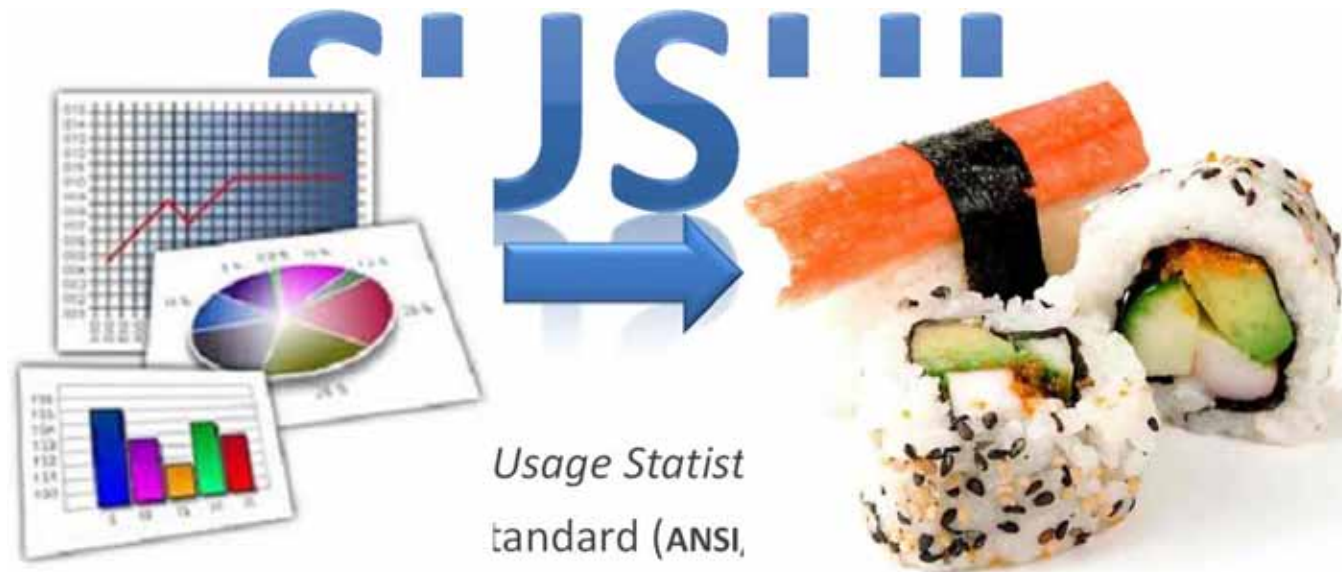

International projects of standardization

The logo for COUNTER, consisting of the word "COUNTER" in white capital letters inside a grid of dark grey rectangular boxes.

<http://www.projectcounter.org/>

The logo for NISO, featuring the word "NISO" in large blue letters, with a stylized graphic of three curved lines in blue, green, and orange to the right. Below it, the tagline "How the information world CONNECTS" is written in smaller blue and red text.

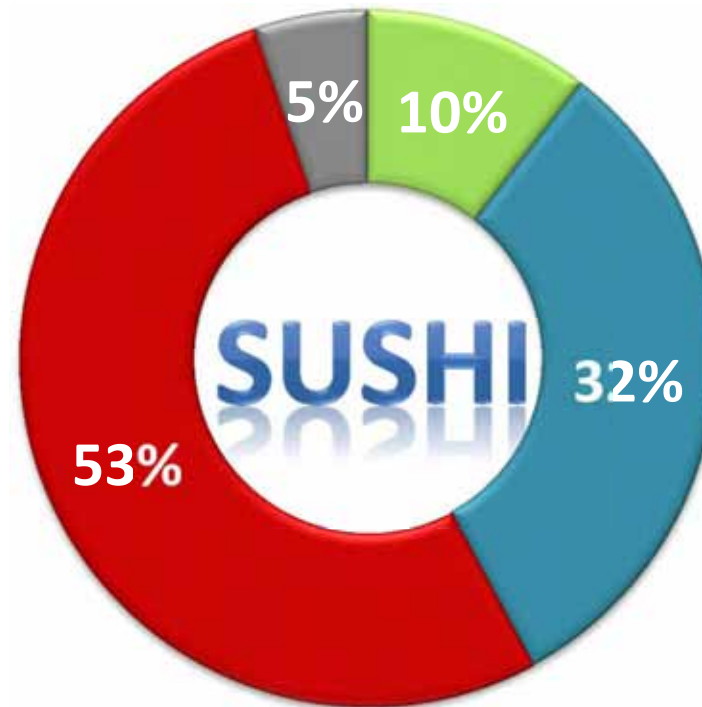

<http://www.niso.org/>

Adequacy to the SUSHI protocol

Databases contracted

■ Fulfill it ■ Partially ■ Do not fulfill it ■ No statistical data

We are thinking about

Should we expect the distributors to give us the statistical data that we need?

Are we entitled to this information when we subscribe to a product?

Is it true that the **COUNTER** reports give all the information that we need to manage our virtual library?

Library management indicators

Objective

Are the statistical data of the contracted electronic resources really useful for library management?

Our conclusions

1. Only 10% of the contracted resources give us complete statistical reports with quantitative information about their use.
2. We have to obtain the qualitative statistical data of our collection use if we want to achieve our clients expectations.
3. And the most important thing is...
