Searching library Web site at the time of
Web 2.0: Who does what? How FAQs can play
a central role in retrieving basic information

12th EAHIL Conference, Lisbon, June 17, 2010

Background

Internet  :

- More information

- More informed users

BUT

Too much help = confusion, noise, waste of time
and as a result a kind of user
like  or like 

How to solve the problem?

FAQs

- Frequently Asked Questions

- Collections of questions and answers on a topic

- Originated in the early 1980s

FAQ features vs other information retrieval tools

- Basic relevant information
- Recurring information
- Based on user information request

Advantages for users

- Ease of use
- Built around them
- Can reduce:
 - noise
 - confusion
 - waste of time

2006 Survey Approach

About 300 Web sites analyzed in order to assess:

- FAQ list presence
- FAQ list location
- FAQ list labelling
- Information categorization and distribution

2006 Survey data

- Web sites providing FAQ list = 42%
- FAQ list location on the homepage = 55%
- Use of the specific "FAQ" label = 84%
- FAQ content distribution within 6 main categories (all Web sites analyzed):
 - general, reference, circulation,
document delivery, facilities,
library computing
- FAQ average number = 47% of Web sites do not exceed 30 FAQs

2006 Survey results

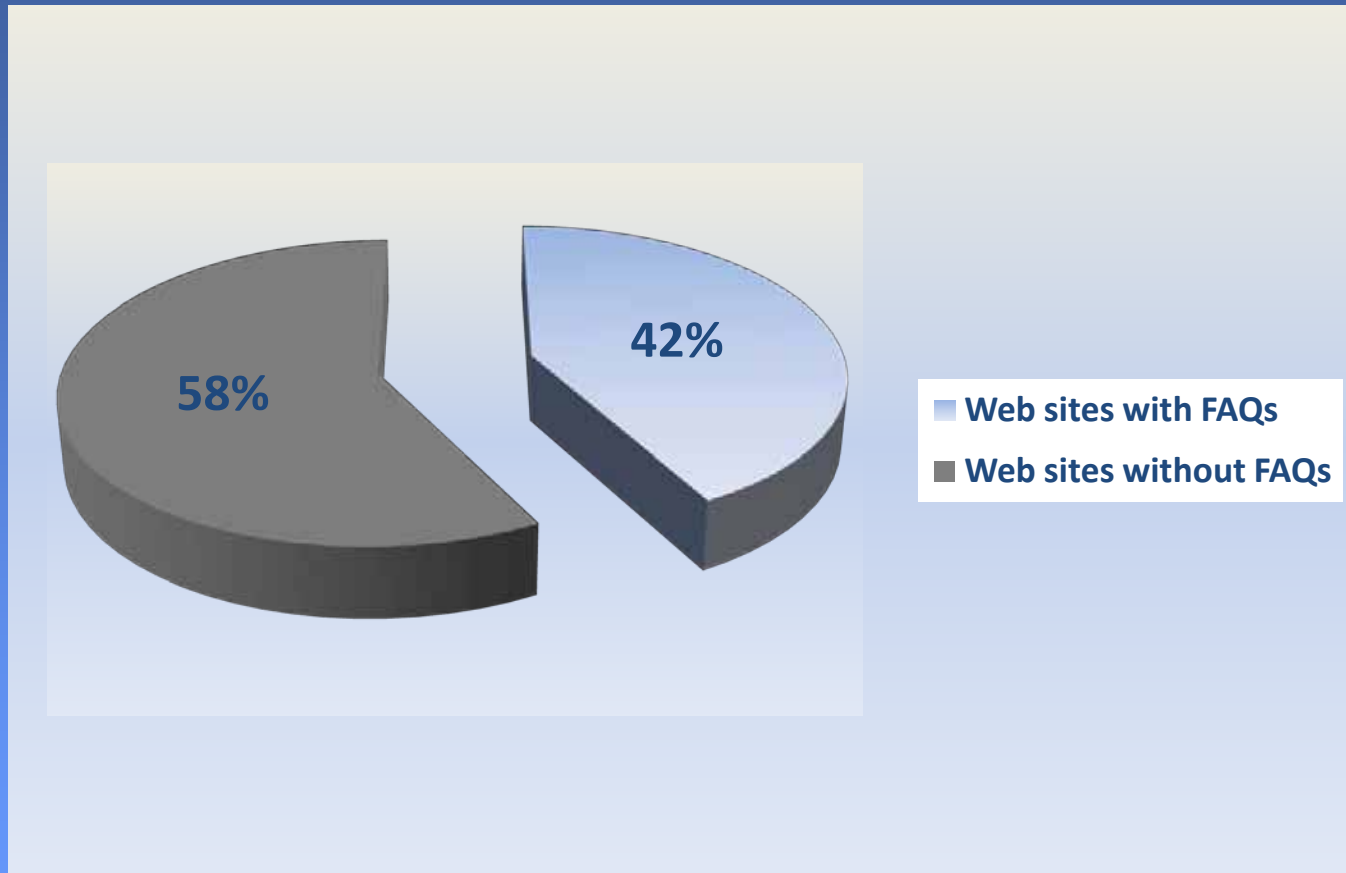

Rules taking into account in building FAQ sections:

- FAQs always on the homepage
- Use of "FAQ" label
- Content distribution: the identified categories
- FAQ average number: between 20 and 30

2010 Survey Approach

- Web sites analyzed in 2006 checked again in 2010
