## INTRODUCTION

We present the results of the survey conducted in 2014 and 2015 to the Hospital Universitario Cruces residents freshman concerning their knowledge in the area of scientific information and documentation in Health Sciences.

## RESULTS

## CONCLUSIONS

The role of information literacy training in the Hospital Library is evident in light of the results of our survey. Have a framework program to initiate and to improve information literacy training is a proposal. This programme should be integrated and complemented with given specialized training in hospitals.
