

DMPTuuli for smart research data management planning

Research data management services

What

data management planning (DMP) tool for Finnish research organizations

- web-based tool to help researchers write DMP's
- based on an open source software solution
- includes research data management plan templates, guides and contact information

Why

careful planning makes data sharing and reuse possible

- research funders require data management plans
- DMP tool enables DMP support and reviewing
- gives an opportunity to link research data management guides into research processes

How

a collaborative project with a user driven approach

- developed together with universities and other research organizations
- workshops and piloting in collaboration with researchers
