Introduction Springer Nature

1.0

Springer Nature

Springer Nature is one of the world's leading global **research, educational and professional publishers**, home to an array of respected and trusted brands providing quality content through a range of innovative products and services.

Springer Nature is the world's largest academic book publisher, publisher of the world's most influential journals and a pioneer in the field of open research. The company numbers almost 13,000 staff in over 50 countries.

Springer Nature was formed in 2015 through the **merger of Nature Publishing Group, Palgrave Macmillan, Macmillan Education and Springer Science+Business Media.**

Special Feature

Mucosal Immunology - Call for papers

Coming in January 2008, *Mucosal Immunology* is a partnership between the Society for Mucosal Immunology and Nature Publishing Group. *Mucosal Immunology* will be the first journal exclusively dedicated to the advancement of mucosal immunology research and practice, providing a forum for basic and clinical scientists to discuss immunity and inflammation involving mucosal tissue. Submissions are now being invited on the following topics: gastrointestinal immunology, pulmonary immunology, nasopharyngeal immunology, oral immunology, ocular immunology, and genitourinary immunology.

New AdisInsight

3.0

AdisInsight

Adis has provided critical content to support drug evaluation for more than 40 years. Adis was acquired by Springer Science + Business Media in 2012 which has served to further support the Adis global mission of providing trusted, scientifically sound data to aid in the development of safer, more effective medications.

Adis Product Management in USA and Italy responsible for strategy, product development, pricing, training, expert support

Large scientific editorial team in India responsible for content production

Team of specialists in NZ responsible for editorial governance and enhancement

Introducing the new AdisInsight platform

AdisInsight is an easy-to-use platform, based on the same design as SpringerLink, that provides scientifically-based content compiled from multiple sources to provide comprehensive and unbiased records, with clear referencing and links to original sources across publishers

AdisInsight brings together the most relevant data on the development of drugs in one easy to use database:

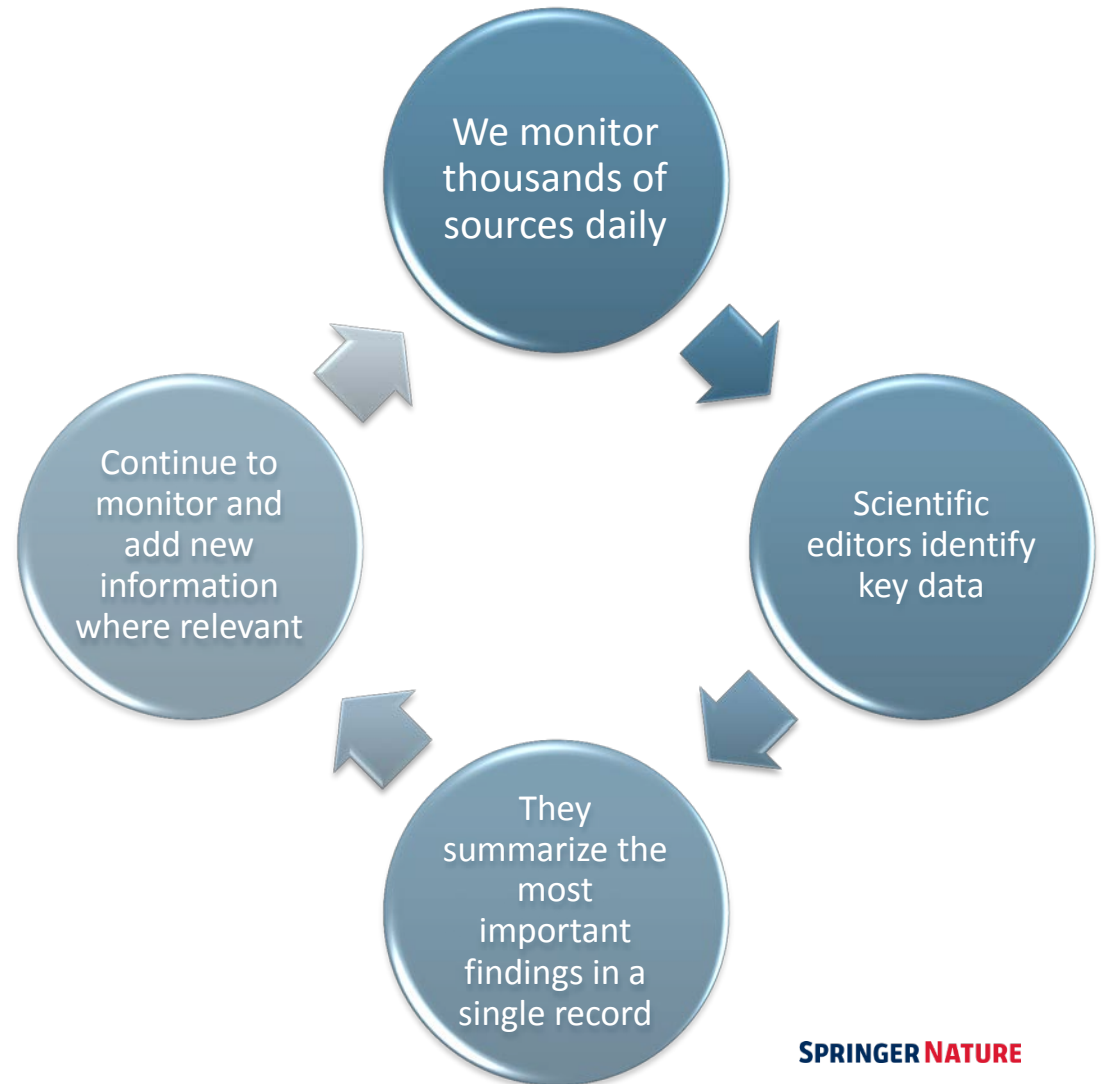

- **Drugs in commercial development worldwide across all therapeutic areas and throughout the entire development process**
- **Trials being performed to advance these drugs through international regulatory pathways**
- **Deals undertaken including acquisitions, joint ventures and collaborations**
- **Safety records including adverse drug reaction case reports and regulatory news**

Content written by scientists

Sources include:

- Medical journals
- Press releases
- Conference proceedings
- Company websites
- Trial registries
- Regulatory agency websites

Thank you!
